NOW HAVE READY

## Many Charming New Styles in Outer Apparel and Millinery

### For Women's and Misses' Autumn Wear

A collection of new models which will assuredly sustain the reputation this house enjoys among discerning women for Fashions of distinct individuality and practical excellence, at sensible prices.

**Tailored Suits** in exclusive plain and fancy effects—imported models by the foremost European couturiers and adaptations of late foreign designs—in the fashionable new materials and shades for Autumn.

**Dresses** for afternoon and informal wear, of silk serge, chiffon, crepe charmeuse and other new materials.

**Evening Gowns** of satin brocades, crepe charmeuse, chiffon, etc., in advance Paris models.

**Blouses** in many distinctive new effects, of silk-marquisette, chiffon, satin and other beautiful materials.

**Furs** in the fashionable new European models—garments, separate pieces and sets.

## The New Paris Millinery

For Autumn wear Paris has decreed many beautiful new Millinery effects, shown here in the late creations of Paul Poiret, Suzanne Talbot, Maison Lewis, Jeanne Lanvin, Georgette and other celebrated artists.

Hats of plush, velvet and velour predominate—some of them showing the fashionable gourd trimming, while others are embellished with ostrich fancies, paradise and new wing effects.

## NO STRIKE DECISION YET

### Vote of Illinois Central Shopmen Being Recanvassed.

Chicago, Sept. 9.—International union officials will neither sanction nor disapprove a strike of Illinois Central shopmen before next Tuesday at the earliest, according to a statement made today by W. F. Kramer, chairman of the board which is considering the situation.

The international officials desire to canvass thoroughly the reasons now being taken on the strike vote before they take any definite action. The recanvass began last Wednesday, and it is thought that the official report on the vote will not be in before Monday night.

"Railroad officials," said Mr. Kramer today, "have averred that the first strike vote was not thorough and that many of the men voted blindly. It is our purpose, therefore, in taking this second canvass of the vote to satisfy ourselves that every man will understand the situation before he casts his ballot."

Even though the advisory council of manufacturers, which meets here tomorrow with other union officials, should favor a strike, it is probable, labor union heads say, that no strike would be called until the international officers have approved such action.

Mr. Kramer, William H. Davies, secretary of the International Association of Steamfitters, and Philip Moran, of the executive board of the Federation of Illinois Central Employees, are said to be among those who are using their influence to prevent radical action.

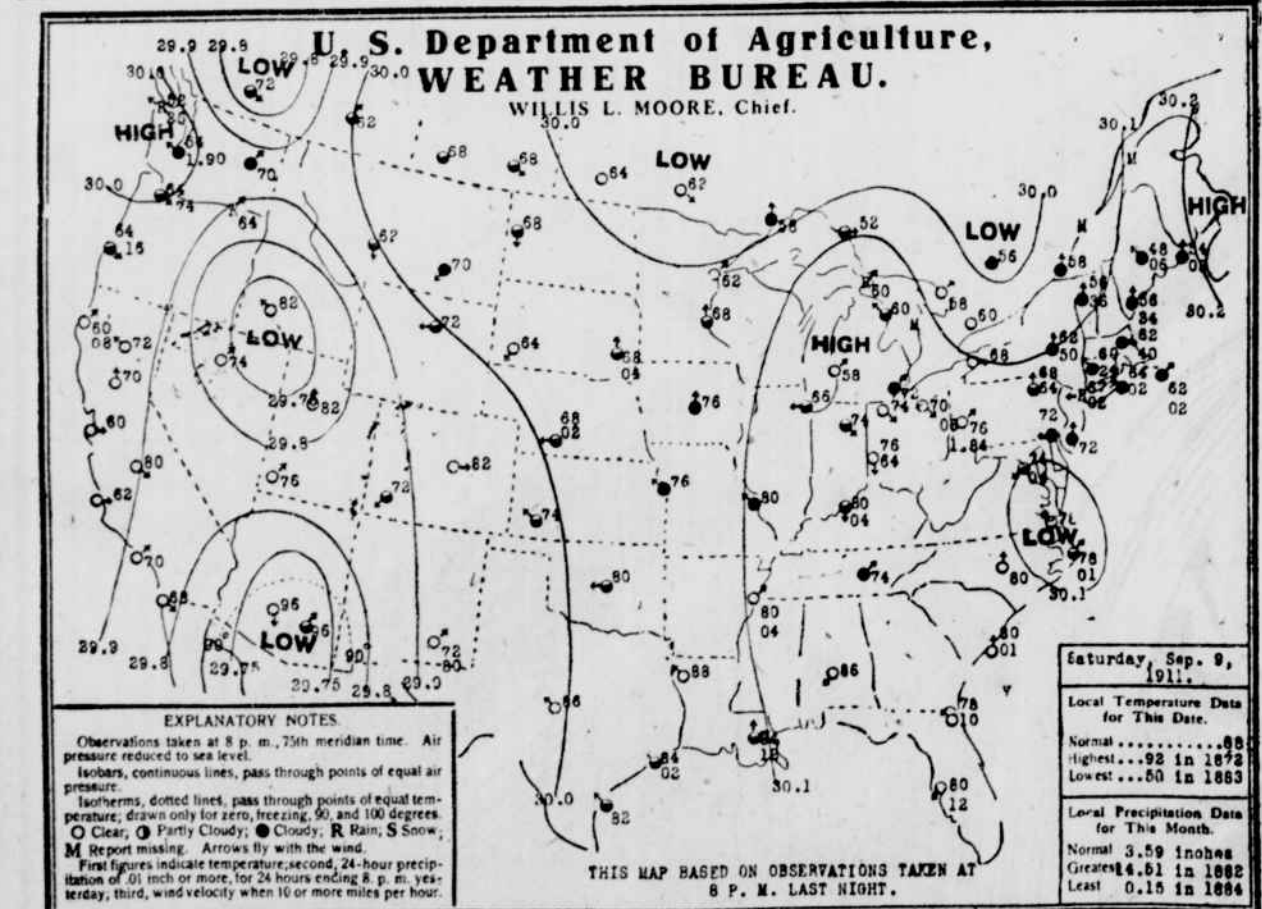

J. F. McCrery, president of the federated body, is one of those leading the movement for a strike. He emphatically declares that a walk-out cannot be averted, in view of the attitude of the railroad officials. He is supported in this position by several members of the executive board of the federation, who insist that definite action be taken at the meeting scheduled to be held here tomorrow afternoon.

Talk of arbitration as a means of settling the dispute was revived today at several informal conferences.

## THE WEATHER REPORT.

**Official Record and Forecast.**—Washington, Sept. 9.—The barometric pressure is quite even over the United States, being slightly above the normal over practically all districts east of the Rocky Mountain region and on the Pacific Coast and relatively low over the west plateau. No disturbance of any consequence occupies any part of the country. There have been local rains during the last twenty-four hours in the middle Atlantic and New England states, the Ohio Valley, along the south Atlantic and Gulf coasts and at widely scattered points in the plains states, Washington and Oregon.

The winds along the New England and middle Atlantic coast will be light variable; south Atlantic coast and east Gulf coast, light variable; except moderate east on South Florida coast; west Gulf coast, lower lakes and upper lakes, light variable.

Temperatures have risen considerably over the upper Mississippi Valley, the plains states and the Northwest, and have changed little elsewhere.

The indications are that the weather will be generally fair Sunday and Monday over practically all districts from the Atlantic Coast westward to and including the Rocky Mountain and plateau regions. Local showers are probable, however, in the south Atlantic and east Gulf coasts. Temperatures will not change materially in any section during the next forty-eight hours.

**Forecast for Special Localities.**—For New England and Eastern New York, cloudy to-day; fair and warmer Monday; light, variable winds. For Eastern Pennsylvania, New Jersey, Delaware, Maryland and the District of Columbia, cloudy early this morning, followed by fair to-day; fair Monday; light, variable winds.

**Local Official Record.**—The following official record from the Weather Bureau shows the changes in the temperature for the last twenty-four hours, in comparison with the corresponding date last year:

	1910-1911.	1910-1911.
3 a. m.	68	61
